

CITY OF SURREY BIOFUEL FACILITY

OUR DOORS WILL BE OPEN!

Saturday June 9, 2018 | 10am-4pm | Surrey Biofuel Facility | 9752 192 Street

You're invited to drop by and discover the story behind our doors!

Ever wanted to find out what new neighbours are like? We are Surrey's Biofuel Facility and we're inviting the local business community, their families and the public to come inside for a look. See the first closed-loop organic waste management system in North America and what makes us Super Loopers!

Bring your family for fun activities and a tour to learn how the facility converts food scraps and other organic waste into renewable natural gas to fuel the City's fleet of natural gas powered waste collection and service vehicles. We're sure you'll be impressed (and relieved) by the highly efficient odour management system and our compost garden.

Free Hot Dogs · Heavy Equipment Demonstrations · Balloon Artist · Face Painting
